

Christian Ngubana

Software Developer

Profile

I'm a full stack software developer with a passion for problem solving. I enjoy working in agile teams where I can use my skills to contribute. I have been working in the software development industry for 2 years.

Employment History

Junior Full Stack Developer Contract at Code Collective, Cape Town

November 2018 – May 2019

I built small to medium size features within an agile team working solo and pairing with other developers. I was exposed to a diverse tech stack, including Web API, C#.NET and SQL Server. I spent my time to problem-solving, generating and evaluating realistic solutions that solved the real world problems presented during our plan sessions.

Software Developer Intern at Bountly, Cape Town

January 2018 – June 2018

I built the front-end portions of new features for a web app product using technologies including react.js, express.js, Sass, HTML. I was exposed to many aspects of a fast growing startup including how the company sourced funding and marketed itself and how they managed their equity allocations.

Project at <http://employeesfeedback.herokuapp.com/>

November 2017

Built a dynamic web app that allows a URL to be sent out to staff for feedback, the application allows staff to log in before answering to yes, no or null. On the record, staff can edit and update their responses. The admin can then login and see all staffs names with their response to the question saved in the database. see GitHub repo at <https://github.com/christianraymond/questionFeedback>

Junior Marketing Consultant at SVN, Kinshasa

June 2009 – October 2010

Tracking sales and market adjustment strategies, worked independently on creating marketing plans while communicating with the marketing team.

Education

Software Development Certificate, Project codeX, Cape Town

February 2017 – January 2018

Exclusive Software engineering program (40% acceptance rate), - Full stack agile software development curriculum to JavaScript, Node.js, Express.js, Ajax, HTML & CSS, DOM, Git&GitHub, Handlebars, MySQL, TDD(Mocha, Chai) Deployment: Heroku, Digital Ocean, including Algorithm architecture and Data structure

Software Development Certificate, Together Technologies, Cape Town

February 2016 – January 2017

Studied web development and computer programming with exposure to Ruby and Ruby on Rails, virtualization/cloud technologies: Git and GitHub, Heroku.

Details
